

Electrical Service & Repair

Experienced Service Team

Today's VFD and SCR rigs require competent service personnel to quickly diagnose problems, make the necessary repairs and restore your rig to operation as quickly as possible.

Integrated Drive Systems exists to provide just such service. The IDS team has over 30 years experience in providing competent field service on both analog and digital equipment in the industrial and oilfield markets.

Our field service technicians are factory qualified to handle problems quickly, efficiently, and with minimum downtime. Our 24 - hour hot line permits you to talk with one of our experienced service technicians. This allows your rig personnel to obtain the required help without costly delay.

**Drillers cannot afford downtime!
IDS Service Teams are available 24/7
Just call 713.462.1400**

Complete Range of Services

IDS is uniquely positioned to service your modern drilling controls

IDS recognizes that drillers cannot afford downtime. That's why we answer your call 24/7, and provide the competent service personnel you need to restore your rig to operation as quickly as possible.

IDS provides timely, quality field service for:

- VFD Systems
- SCR Houses
- Generator Controls
- PLC Controls
- Driller's Controls

IDS also offers:

- Training Classes
- Engineering Support
- Control Equipment Surveys

Our service team is available 24-hours per day, 7 days per week, and is ready to provide your field service or shop repair needs.
